PRESS RELEASE

CeramTec plans expansion at the Marktredwitz site

Planning for the construction of a new production hall has begun

Marktredwitz/Plochingen, 10 October 2022 - The advanced ceramics manufacturer CeramTec is planning to expand its presence at the Marktredwitz site. The already existing manufacturing complex is to be expanded in the coming years to include, among other things, a further production hall.

Dr Hadi Saleh, Chief Executive Officer of CeramTec: "Our well-filled order books make it necessary for us to expand capacities. At the Marktredwitz site, we have already been able to count on an extremely reliable and sustainable network of employees and partners in the past. We are therefore pleased to be able to further expand our presence in Marktredwitz and thus also play an even more important role as an employer in the region in the future." CeramTec currently employs more than 800 people at their Marktredwitz site.

Among other things, the new building is to be designed with a special focus on sustainability aspects. "In the CeramTec Group, we introduced measures for an even more conscious use of energy some time ago and have already implemented various projects and measures. The new building offers us excellent opportunities to produce even more energy-efficiently and sustainably in the future and thus make an important contribution to the energy transition in Germany," says Dr Saleh.

Subject to official approval for the project, the start of construction with initial work is planned for 2023.

About CeramTec

CeramTec is a leading global med-tech platform with a focus on high-performance ceramics (“HPC”) solutions, and is specialized in the development, manufacturing and sale of parts, components and products made from ceramic materials. With over a century of developmental and production experience in the HPC industry, CeramTec is a global leader in the manufacturing of advanced ceramics and engineers these materials for use in a wide variety of applications. HPC from CeramTec are used in a range of areas, including critical medical applications such as hip replacements, other orthopaedic implants, dental implants and medical equipment, and industries including mobility, electronics, and also in other industrial applications. With production sites and subsidiaries in Europe, North and South America as well as Asia, CeramTec maintains its presence around the globe as a manufacturer and supplier. CeramTec is headquartered at Plochingen (Germany).
